

PUMA DVR-009 Cheat Sheet

Media Card

- Insert provided 8GB Media Card into Card Slot

Date/Time Set

- Plug the DVR into your computer via the USB port
- Visit www.pumarecorders.com ,
- Left Click on the “Support” Tab
- Left Click on “PUMA DVR Software”

If you prefer to manually set “Time/Date”

- Plug the DVR into your computer via the USB port
- Open Root Menu of DVR, Right Click and select 'New' then 'Text Document'
- Rename Text Document to 'timerset.txt'
- Open the text file and Input Date in following format: YYYYMMDDHHMMSS y
(Example: February 26, 2010 - 12:30:00 would be entered as 20100226123000 y)
- When done Click 'File' then 'Save' and Exit out of the Text Document
- There will now be date/time displayed on the next video recording.

Recharging the DVR

- Make sure the Power Switch is in the ‘On’ position
- Plug the DVR into any USB port and charging will begin

Making a Recording

- Turn the Power Switch to the ‘On’ Position
- Hold the Mode Button for 3 – 5 seconds until constant Red Light appears
- Place in pocket or preferred location
- Press the Top Button of the DVR to begin a recording, press again to conclude recording.

To conserve battery life, it is recommended you turn the power switch to the ‘Off’ position between recordings.

Download Recordings

- Plug the DVR into your computer via the USB port
- Open Root Menu
- Copy and Paste recordings to your desired computer folder or storage location

Note* Do not attempt to play recordings from the DVR.
