Introducing PUMA Management Software Basic Edition, offering the power of our full PUMA Management platform modified for a single user.

PUMA Basic gives you the same ability to quickly download recordings to your PC, add file information if needed and store the audio recordings securely. With various search options a recording can be easily retrieved for playback or copied to a CD. You'll quickly become accustomed to the benefits of the PUMA Management System, as the right solution to securely and efficiently manage your audio recordings.

Features:

- Audio recordings are quickly and efficiently transferred from the PUMA II Digital Recorder
- Identify and catalog audio recording by date, time, officer, case number, citation number or subject name
- Copy audio files to CD/DVD for distribution
- Simplified interface for ease-of-use
- With various search options a recording can be quickly retrieved for playback or copied to a CD
- Audio files are encrypted with 256-bit AES encryption
- Password protected
