

PUMA

Voice Management Solution for Digital Portables

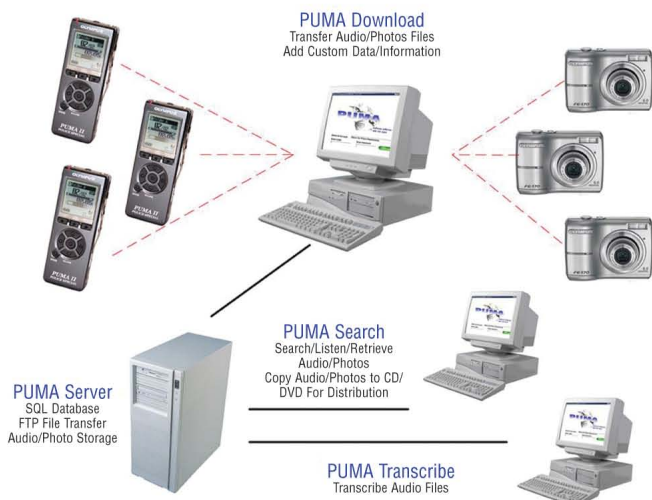

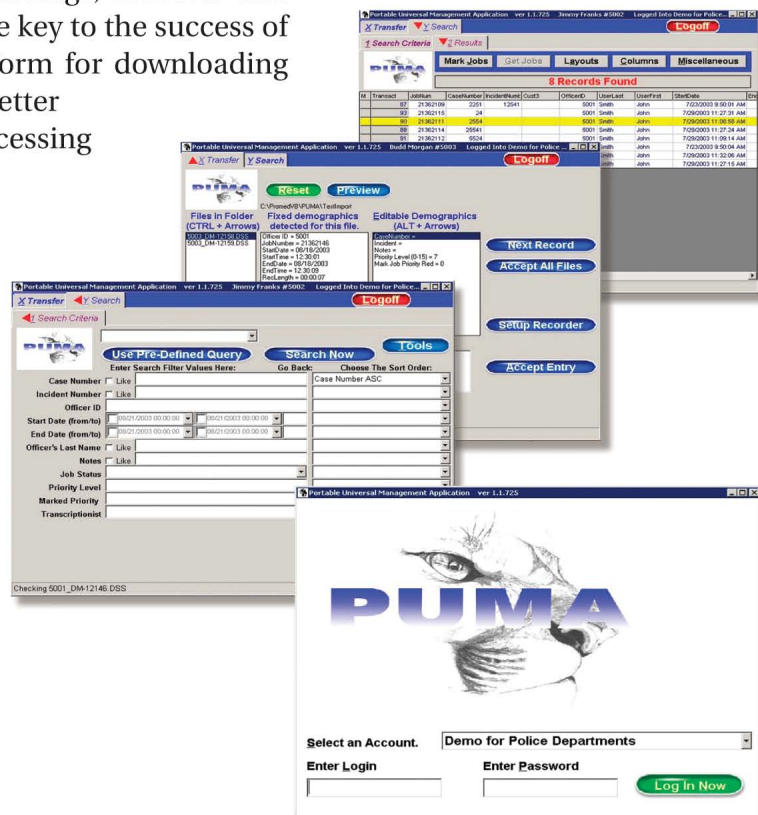

PUMA is designed exclusively for Law Enforcement and is the most complete file management system available for storage, retrieval and management of Digital Recordings and photos. The key to the success of PUMA is its ability to offer Officers an easy platform for downloading their digital voice recordings as well as providing better access to recordings and improved efficiency in accessing information.

PUMA provides officers the option of adding custom demographics such as a Case Number or Incident Number providing important information about the recordings that can be used later when searching for these files.

PUMA is fully integrated with transcription software allowing transcriptionist to receive and transcribe routed work.

PUMA has expanded its capabilities by adding Digital Photo Management as an option to further meet the needs of managing digital assets.

Features Include:

- Copy audio files to CD/DVD for distribution
- Accepts DSS and WMA file formats
- Simplified interface for ease-of-use
- Custom demographics for department's unique needs
- Multiple search options to access data
- Internal messaging system
- Flexible security levels and access rights
- Detailed audit trail
- Audio files are encrypted with 256-bit AES encryption
- Password protected
- Built-in transcription support
